Dispensing Doctors & Hospital Pharmacy
Dispex Ltd (01604 859000)

The
POPPITT
Company

We specialise in developing devices to assist pharmacists with the de-blistering process to prepare medication for Monitor Dosage Systems.

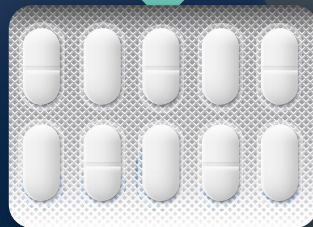

The Poppitt Company is based in the UK with a worldwide client base. Our current device assists with the prevention of repetitive strain injury (RSI) and we've recently launched a BRAND NEW product in the UK - The Personal Poppitt, designed for home use, to assist the elderly and less dexterous.

The electronic Professional Poppitt device is a small bench-top machine that allows pharmacies to remove tablets and capsules from their original blister packs without developing sore fingers and thumbs.

TIME SAVING

The simple operation of the Professional Poppitt ensures that tablets and capsules can be swiftly removed from blister packaging without wasting time. The popping of tablets by hand can be extremely time consuming and our device can help reduce the time it takes to do so.

Don't wait for your pharmacy team to complain and develop symptoms of repetitive stress injury (RSI) – purchase a Professional Poppitt machine today, and you will see the difference straight away.

Removes tablets and capsules from blister packaging with ease at home.

USES

The Personal Poppitt has been specially designed for use by the elderly and the less dexterous, to assist in the removal of tablets and capsules from blister packaging at home.

DESIGN

The sleek design of the Personal Poppitt ensures simple use with the option to purchase a set of drawers to assist in storing different tablets for different times of the day etc.

Clean the Personal Poppitt easily, the stainless steel plate allows cleaning with a damp cloth and the device can also be washed in warm soapy water.

OPERATION

The Personal Poppitt machine swiftly pushes out tablets and capsules from blister packets. Simply place the blister packet into the device to 'pop' tablets with ease at home.

EASY TO USE

The Personal Poppitt is easy to use, our device is simple to operate and can pop tablets in various shapes and sizes and is also easy to clean.

All devices are fully tested before dispatch and are delivered with full instructions for use. Any queries don't hesitate to contact us.
